Projects

NYRESA

GitHub  | Deployed 

Nyresa is an e-commerce website where users can buy products such as clothes, apparel, etc.

It is a collaborative project developed in 6 days with a team of 5 members.

Tech Stack - JavaScript, React, Redux, ChakraUI

Features -

- Fully responsive design with smooth UI
- Complete state management using redux

Areas of Responsibility -

- Built the Register and Login section of the website
- Added proper form validation with authentication

HOSPITAL MANAGEMENT APP

GitHub  | Deployed 

An app that can be used for the management of a hospital. Tasks such as admitting a patient, booking an appointment, creating a report, and more can be done with the app.

It is a collaborative project developed with 2 other members and took about 3 weeks to complete.

Tech Stack - Ant Design, React, Redux, MongoDB, Express, NodeJs

Features -

- Frontend has a client-facing side and a separate dashboard for staff
- Backend has complete authentication and a secured database

Areas of Responsibility -

- Built the entire backend for the app
- Added authentication and error handling at every step
